The Cornflower Aster

Stokesia Cyanea.

This is one of our most charming and beautiful native hardy plants. The plant grows from 18 to 24 inches high, bearing freely from early July until frost, its handsome lavender-blue Centaurea-like blossoms, each measuring from 4 to 5 inches across. It is of the easiest culture, succeeding in any open sunny position, and is not only desirable as a single plant in the mixed hardy border but can be used with fine effect in masses or beds of any size. **Pkt., 100 seeds, 8 cts.**

Hohenzollern Aster.

Ostrich Feather type of Asters. Much larger than the Giant Comet, the petals longer and more curled and twisted, and produced in greater abundance. Borne on long stem which makes it very desirable for cut flowers. Mixed colors. **Pkt., 100 seeds, 8 cts.**

New Comet Aster.

The plants of this new variety are perfectly true in character, growing twelve to fifteen inches high and covered with large double flowers, as shown in the illustration. The flowers measure from $3\frac{1}{2}$ to $4\frac{1}{2}$ inches in diameter, resembling in shape and artistically curved and twisted petals, the finest Chinese Chrysanthemums. Mixed colors. **Pkt., 150 seeds, 5 cts.**

COMET—Pure white. **Pkt., 100 seeds, 5 cts.**
COMET—Deep scarlet. **Pkt., 100 seeds, 5 cts.**
COMET—Light blue. **Pkt., 100 seeds, 5 cts.**
COMET—Pure lilac. **Pkt., 100 seeds, 5 cts.**

Aster, New Japanese or Tassel.

The beautiful flowers of this new strain of Asters offer a most striking contrast with those of any other variety. They are of immense size measuring from five to six inches across, with long petals curiously waved and curled, so as to give them a striking resemblance to the Japanese Chrysanthemums. They grow fourteen or fifteen inches high, are well branched and produce a number of enormous flowers. Colors, flesh and pink. **Pkt., 150 seeds, 5 cts.**

Flora B. Vunk, Fallette, N. Y., writes:—Last year I had your eight cent collection of seeds; the first I had ever had from you. I was much pleased with them. My asters were ever so nice and the pansies were simply beautiful. In comparing your prices with others I find yours are much cheaper.

From Mrs. Isabelle Goodwin, East Lebanon, Maine:—I had the loveliest asters I ever saw from seed purchased of you. They were all colors of the rainbow, and so large; some being nearly five inches across. Such beauties. All of your seeds do fine for me. I wish you every success.

Mrs. C. D. Brown, Onelda, N. Y. March 14th, 1905, writes.—Our seeds from you last year were fine, especially the petunias. I never saw such beauties. I took up some in the fall and have them in my window garden. One is a mass of white and purple now.

ASTER NEW VICTORIA

Mrs. Mary Foster, Troy, N. Y., Feb. 26, 1905, writes—I think those Petunias, Asters and Pink seeds I had from you last year were the handsomest flowers I ever saw and I will say that your seeds are the best I ever used.

New White Branching Aster.

The magnificent, large double white flowers, quite four inches in diameter, are borne upon long stems, making them excellent for cutting. **Pkt., 150 seeds, 5 cts.**

New Yellow Aster.

The form of the double flower is a perfect ball; the quills are close together and of the brightest sulphur yellow, not a mere indication of the color, as in all former productions. The border petals are broad and of a lighter tint, seeming to enclose the flower like an old-fashioned bouquet paper. The flowers are borne upon long, erect stems, excellent for cutting. Plants, twelve to fifteen inches high, are of compact, hardy growth, and most abundant bloomers. **Pkt., 150 seeds, 5 cts.**

My Dear Miss Lippincott:—

Last year I purchased your eight cent collection of seeds, consisting of Asters, Pansies, Nasturtiums and Sweet Peas. The sweet peas grew to a height of twelve feet and were covered with the fragrant blossoms from early in July until October.

Your seeds have always given perfect satisfaction.

Yours,

Annie H. Schooley.

Campanula, Double Mixed.

NOTE—The seed saved from double flowers will always produce some single flowers, no matter how careful the selection. *Pkt., 200 seeds, 5 cts.*

L. Shryock, Wessington Springs, March 31, 1905, writes: Your Mammoth Verbena are certainly worthy of the name. I had last year the loveliest bed verbena in the country.

Centaurea Imperialis.

Centaurea Imperialis is of the easiest culture and flowers continually from early spring until fall. Flowers are double the size of *Centaurea Marguerite*, of various tints and colors, pure white, lilac, rose, purple and dark red, supported on long stems, which renders them very desirable for cut flowers and corsage bouquets. They have the same delicate odor and form as the *Centaurea Marguerite*. Mixed colors. **Pkt., 75 seeds, 6 cts.**

Centaurea Marguerite.

The most fragrant and longest keeping cut flower. One of the most valuable introductions of late years. The flowers are the size of a medium *Caruatum*, freely produced on long stems, which renders them valuable for cutting; color pure white, pale sulphur-yellow and lavender. The flowers are sweet-scented, and their lasting quality after being cut is remarkable. The plants grow about eighteen inches high and are of the easiest culture; from spring-sown seed they commence to flower in July and continue until late in the autumn. The novelty is entirely distinct from all other *Centaureas*, and undoubtedly the most beautiful variety known. Mixed colors. **Pkt., 100 seeds, 5 cts.**

Cineraria, Hybrida.

One of the most popular of all green-house plants, and what a splendid display they make when well grown. I know of no plant so easily grown as the *Cineraria*. The secret of growing well is to grow fast, never allowing them to receive a check, either from being pot bound, dryness of root, or attack of insects; the cooler they are kept the better. In colors they range from crimson, magenta, violet, purple and variegated. Large flowering mixed. **Pkt., 200 seeds, 8 cts.**

Kokhla Scoparla or Summer Cypress.

The plants grow freely from seed sown in the open ground, when the trees are coming out in leaf, and from the earliest stage of growth in the spring until they reach maturity in the fall the plants are always of globe-like form. The plants branch freely, and stems are clothed with slender light green leaves. Early in the fall the ends of shoots are thickly set with small bright-scarlet flowers, — the bushy plants resembling balls of fire. The plants are equally showy, planted singly to show the round ball-like form on all sides, or grown in continuous rows or hedges. **Pkt., 200 seeds, 5 cts.**

New Early Blooming Cosmos, Dawn.

This beautiful new strain produces abundantly well-formed lovely flowers of large size; pure white, pink and crimson in color. It can be had in bloom from July to November and grows freely everywhere. **Pkt., 100 seeds, 5 cts.**

Shasta Daisy—One-Half Natural Size.

THE SHASTA DAISY is one of the most marvelous productions in the flower line that has ever been brought to the notice of floriculturists. It is the first of a new type, which has been obtained by first combining the free-flowering American species with the large, but coarse European species and the Japanese species, Nipponicum, after which rigid selection through a series of years has produced the present wonderfully beautiful and useful strain. Its first qualification is hardness; it can be grown out of doors by anybody where it is not cold enough to kill oak trees. It is perennial, blooming better and more abundantly each season. It can be multiplied rapidly by simple division, and it is not particular as to soil. It blooms for several months. The flowers are extremely large and graceful, averaging about four inches in diameter, with three or more rows of petals of the purest glistening whiteness, and are borne on single, strong, stiff, wiry stems, nearly two feet in length. The blooms when cut remain perfectly fresh and in good condition for two weeks or more. No other flower can compare with it in usefulness. *Pkt., 100 seeds, 10 cts.*

This novelty is specially distinguished from other Pansies by the plant being full and spreading with very broad and extremely dark green leaves. The straight and stiff stems it possesses cause the flowers to stand out well from the foliage. The colors of the blossom range through all the shades of red, from a pink to a fine deep purple, with an intermediate bright red edged with white. The face of the flower in some cases is regular in color, while in others it is lined and striped. The extraordinary size of the flowers, which reach as much as 3 to 3½ inches in diameter, make it a novelty of the first rank, and one that is sure to be sought after by lovers of Pansies. *Pkt., 100 seeds, 10 cts.*

Giant Yellow Prince Pansy.

The color is pure golden yellow, shaded canary, sometimes with the three lower petals marked with purplish or red blotches and hair lines. It is impossible to reproduce by means of the printer's art the grand depth of brilliant color presented by this beautiful Pansy when well grown. *Pkt., 100 seeds, 6 cts.*

Mrs. S. Hotchkiss, Temple, Texas, Feb. 9, 1905, writes—The finest Sweet Peas I ever saw I grew from your seeds, six years ago at Brownwood, Texas. Your seeds have always proved good and true to name.

"Masterpiece" or Ruffled Pansy.

This strain comes nearer to "Double Pansies" than anything ever introduced under that name. The number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across, and the color variations and combinations are odd and striking. *Pkt., 100 seeds, 10 cts.*

Giant White Spotted Pansy.

The flowers are very large, pure white with a violet blotch on the three lower petals, of good form and substance. *Pkt., 100 seeds, 6 cts.*

Royal Show Pansies.

Is a mixture especially prepared by myself from separate strains and colors of all the largest flowering and finest varieties that can be secured in Europe, and is unsurpassed in beauty, color and markings. *Pkt., 150 seeds, 10 cts.*

Black Prince Pansy.

A distinct pansy of sterling merit. The rich, glossy black has a peculiarly soft, velvety appearance; the magnificent large flowers are of fine circular form and carried upright well above the foliage; the plants are of very compact, bushy habit, and flower so profusely that the bed of the Black Prince makes a sight not often equalled. *Pkt., 100 seeds, 6 cts.*

Pansy, President Carnot.

Flowers of great size and rounded form; the center of each of the large, rounded petals is heavily blotched with a soft, rich shade of violet-purple. The edges distinctly outlined with a snow-white band, in the center of the lower petals the color deepens to a velvety-brown tint, contrasting richly with the yellow of the small distinct eye. *Pkt., 100 seeds, 6 cts.*

New Giant Trimardeau Pansy.

Remarkable for the extra large size of the flowers, which, however, are not so circular in form as the "Imperial Germain" or the "Royal Show." *Pkt., 100 seeds, 6 cts.*

Sweet Scented Pansies.

The Perfume of the Violet. The Beauty of the Pansy.

This new class is the result of crossing the Pansy (*viola tricolor*) with the Sweet Violet (*viola cornuta*); the resulting hybrids, in addition to retaining the delightful Violet Perfume, produce the most beautiful Pansy-like blossoms, 2 to 2½ inches across, of great substance and of an endless variety of colors. They are not all equally fragrant, though the majority are as highly scented as the sweetest Violet, and the other high merits of this new strain, aside from their perfume, destine them to wide popularity. Mixed colors. *Pkt., 100 seeds, 5 cts.*

Pansy.

Good Mixed. Fine for bedding. Many rich colors. *Pkt., 100 seeds, 3 cts.*

R. D. Webb, 2631 Irving Ave. So., Minneapolis, Minn., Sept. 25, '05, writes:—I bought one-half bushel of the best mixed lawn grass seed in April last, and must say that the results were most satisfactory, having obtained a perfect lawn of thick heavy turf which produced an even and uniform surface and I was able to cut the grass early in July, thereby giving me a lawn that was both a pleasure and an object of beauty, from seed the first year.

Fire King Pansy.

This novelty comes almost absolutely true, scarcely a plant bearing flowers at variance from the type, which is very distinct and striking. The three lower petals each have a large blotch of deep brown-red or magenta, margined with yellow, while the upper petals are of a bright reddish-brown, of a real fiery shade, warranting the name of *Fire King*. *Pkt., 100 seeds, 4 cts.*

Snow Queen Pansy.

Pure satiny white with yellow dot in center of flowers, sometimes marked near center with faint blue or purple lines; altogether the least picturesque of any of the different classes of Pansies; it is very highly prized by a great many pansy lovers for just that reason. *Pkt., 100 seeds, 4 cts.*

Peacock Pansy.

A beautiful variety of ultramarine blue in the upper petals of the flower, edged with a thin white line, within which is a space of purplish crimson, passing into a rich central blotch of deep blue, shading to black. Named "Peacock" because the blending colors resemble the feathers of a peacock. *Pkt., 100 seeds, 4 cts.*

New Red Mixed Pansy.

The first color is deep, velvety brown, shaded into a narrow band of deep golden yellow, which borders each petal. The perfect flowers show a distinct face, marking a rich gold and deep brown. *Pkt., 100 seeds, 4 cts.*

Pansy, Emperor William.

Ultramarine blue with violet eye. *Pkt., 100 seeds, 4 cts.*
